Campus, Peterborough, Ontario

**Thursday April 20, 2017, 8:30 a.m.
to 3:30 p.m.**

Regional Competition Day

Fleming College, Sutherland
Campus, Peterborough, Ontario

What is the Envirothon?

- The Ontario Envirothon is part of the larger North American Envirothon program.
- The program is broken down into Regional Competitions that take place across Ontario and then an Ontario Envirothon Championship that sees the winner from each region come together to compete for the provincial title.
- Winners of the Ontario Envirothon Championship represent the province at the North American Envirothon Championship that takes place in the summer. Students have the opportunity to win unique prizes and scholarships at all levels along the way.

What is the Envirothon?

Regional Training Workshop Day

- Activities are designed to ensure teams have the required knowledge and skills for the Competition Day through hands-on training.
- Experts deliver training sessions related to the five core topics at Eco stations.
- Teams rotate through each station and participate in activities related to the learning objectives and information included in the study guides for each topic.

Regional Competition Day

- Competition Format: **Five eco-stations** that teams rotate through and complete written tests and hands-on activities. 75 per cent of the total score; **Presentations** focused on the current issue. The presentations are 8-10 minutes long and valued at 25 per cent of the total competition score.
- Winners of the Regional Competition will be announced at the end of the Competition Day.
- The winning team will go on to compete at the Ontario Provincial Envirothon Competition, May 28 to June 1 at Fleming College, Frost Campus, Lindsay, Ontario.

Connecting the Envirothon to CCAP

- Engaging high school students in learning about the natural environment, the impacts of climate change on each of the four core issues, with a current issue on sustainable agriculture.
- CCAP Actions:
 - Youth engagement
 - Fostering a culture of awareness
 - Encouraging civic engagement
 - Protecting and enhancing natural assets
 - Facilitating best management practices for low emissions farming
 - Supporting localization of the food system
